PROJECTS

ECOMMERCE

Date 2024
- Developed a fully interactive and responsive Ecommerce web application providing CRUD operations using ReactJs, Redux Toolkit and Firebase.
- Implemented features such as State management, real-time cart changes, user authentication, Firebase storage, reusable components, Form Validation and a responsive design.

CRYPTOVERSE

A Cryptocurrency Tracking Web App
- Developed a cryptocurrency tracking app that provides the current rates of all known cryptocurrencies.
- Implemented using REST API. It also displays the price history of these currencies in daily, weekly or monthly time intervals.
- Implemented responsive design to enhance the user experience on all devices (mobile, tablet, laptop etc.).

DISNEY PLUS CLONE

A Disney-plus clone Web App
- Developed a fully interactive and responsive multi-page Disney-plus clone using ReactJs, Redux Toolkit and Firebase.
- Implemented features such as user authentication, state management using Redux Toolkit.

WEATHERLY

A Weather Forecasting Web App
- Developed a weather app that displays the weather conditions of the desired location using REST API.
- Implemented responsive design to enhance the user experience on all devices (mobile, tablet, laptop etc.).
